LEVEL	PARAMETER	TYPE	DESCRIPTION	MANDATORY (Yes/No/CM)	NOTES
1	po_number	string	Purchase Order Number	Yes	Unique ID for the order
1	invoice_number	string	Supplier's invoice number	Yes	Must be unique per supplier
1	invoice_date	string	Date of invoice	Yes	Format: `YYYY-MM-DD`
1	delivery_date	string	Date of delivery	Yes	Format: `YYYY-MM-DD`
2	tax_distribution	array	Summary of taxes applied	Yes	
2.1.1	gst_type	string	GST Type (CGST/SGST/IGST/CESS/AdditionalCESS)	Yes	
2.1.2	gst_percentage	number	GST rate percentage	Yes	
2.1.3	gst_total	number	Total GST amount	Yes	
3	basic_price	string	Basic price of all the items in the invoice **exclusive of tax**	Yes	Stringified number
4	landing_price	string	Landing price of all items in the invoice	Yes	
5	box_count	string	Total number of boxes	No	Optional
6	quantity	string	Total quantity of items	Yes	
7	item_count	string	Number of unique items in the invoice	Yes	
8	po_status	string	Status of the Purchase Order (Only applicable for multi-grn)	No	Example: `PO_FULFILLED`,

					`PARTIALLY_FULFILLED`
9	supplier_details	object	Supplier metadata	Yes	
9.1	name	string	Supplier's legal name	Yes	
9.2	gstin	string	Supplier GST Identification Number	Yes	
9.3	supplier_address	object	Address of supplier	Yes	Nested details below
9.3.1	addressLine1	string	Address line 1	Yes	
9.3.2	addressLine2	string	Address line 2	No	
9.3.3	city	string	City	Yes	
9.3.4	country	string	Country	Yes	
9.3.5	phone	string	Contact number	No	
9.3.6	postal_code	string	ZIP/Postal code	Yes	
9.3.7	state	string	State	Yes	
10	buyer_details	object	Buying entity details	Yes	
10.1	gstin	string	GST number of buyer	Yes	
11	shipment_details	object	Delivery/transport details	Yes	
11.1	e_way_bill_number	string	E-Way bill number	No	
11.2	delivery_type	string	Type of delivery (COURIER, SELF)	Yes	
11.3	delivery_partner	string	Name of delivery partner	Yes	In case of delivery_type is COURIER this is a mandatory field Example : “BlueDart“, “Delhivery“ etc.
11.4	delivery_tracking_code	string	Tracking Code	Yes	In case of delivery_type is COURIER this is a mandatory field
11.5	license_number	string	Vehicle number	Optional Mandtory on tenant level	Eg: Truck number is `DL-311/431`
11.6	driver_phone_number	string	driver phone number	optional	Eg: 7703862XXXX
12	items	array	List of item(s) in the shipment	Yes	At least one required

12.1	item_id	string	Unique item identifier of Blinkit System	No	
12.2	sku_code	string	Description of the SKU	No	
12.3	batch_number	string	Manufacturing batch number	Yes	
12.4	sku_description	string	Description of SKU	Yes	
12.5	upc	string	Universal Product Code	Yes	
12.6	case_config	number	number of items that can be stored inside one case	Yes	
12.7	quantity	number	Quantity of this item	Yes	
12.8	mrp	number	Maximum retail price	Yes	
12.9	hsn_code	string	Harmonized System Nomenclature code	No	
12.10	total_additional_cess_value	number	total additional cess value applied	no	this can be 0
12.11	tax_distribution	object	Tax distribution for the item	Yes	Includes CGST, SGST, IGST, etc.
12.11.1	cgst_percentage	string	CGST percentage	Yes	
12.11.2	sgst_percentage	string	SGST percentage	Yes	
12.11.3	igst_percentage	string	IGST percentage	Yes	
12.11.4	ugst_percentage	string	UGST applied on item	Yes	
12.11.5	cess_percentage	string	CESS applied on item	Yes	
12.11.6	additional_cess_value	string	Any additional cess	Yes	
12.12	unit_discount_amount	string	Discount per unit	No	
12.13	unit_discount_percentage	string	Discount % per unit	No	
12.14	unit_basic_price	string	Base price per unit	Yes	
12.15	unit_landing_price	string	Final price per unit (post discount, taxes, etc.)	Yes	
12.16	expiry_date	string	Expiry date of the product	CM (Provide ExpiryDate or MfgDate + ShelfLife)	Format: `YYYY-MM-DD`
12.17	mfg_date	string	Manufacturing date	CM (Provide ExpiryDate or	Format: `YYYY-MM-DD`

				MfgDate + ShelfLife)	
12.18	shelf_life	Integer	Shelf life of product in Days	CM (Provide ExpiryDate or MfgDate + ShelfLife)	
12.19	uom	object	Unit of measurement and volume per unit	Yes	e.g., ml, kg, piece e.g., 12, 14 values
12.20	no_of_packages	string	Packages for this item	No	
12.21	code_category	string	Label type (e.g., QR, Barcode)	No	Optional
12.22	codes	array	List of codes for traceability	No	
12.23	case_configuration	array	array of objects which contains the information of case type and their values	No	
12.23.1	case_configuration[0].level	string	outer_case or inner case level of cases	No	
12.23.2	case_configuration[0].type	string	ENUM values only currently expected : “CRATES“, “PACKETS“.	No	
12.23.3	case_configuration[0].value	number	Inside type of case how many units are there	No	

Response Payload

```

Note on ASN API Response Status Codes and Error Structure

- In case of **partial acceptance** or **full acceptance** of an ASN against a PO and invoice, the HTTP status code will always be in the **2XX range**.

  For partial acceptance, any required updates will be included in a `warning` field in the response payload.
- In case of **REJECTION**, you will receive an error response:
  - If there is **even a single error with** `level = "asn"`, the request will be considered **rejected**.
  - You will still see item-level updates or required changes in the `errors` field for `level = "item"` errors, even when the ASN is rejected.
- Regarding the `error_params` object:
  - For **ASN-level errors** (`level = "asn"`), `error_params` will always contain:
    - `po_number`
    - `invoice_number`
  - For **item-level errors** (`level = "item"`), `error_params` will always contain:
    - `item_ids` : a list of affected item IDs (e.g., `["104123", "124390"]`)

- These keys will always be present in their respective error objects for consistency.

Response Payload Details

LEVEL	PARAMETER	TYPE	DESCRIPTION	MANDATORY	NOTES
1	successful	boolean	Indicates if the PO sync operation was successful	Yes	`true` = operation executed; does not mean all items succeeded
2	asn_sync_status	string	Sync status of the PO	Yes	Possible values: `ACCEPTED`, `REJECTED`, `PARTIALLY_ACCEPTED`
3	po_number	string	Code of the synced purchase order	Yes	Used for tracking and reference
4	message	string	High-level message summarising the result	No	Human-readable summary
5	invoice_number	string	Invoice number associated against the ASN.	Yes	
6	asn_id	string	a reference id against the asn that has been synced	No	In case of rejected ASN we will not be providing the asn_id in response.
7	success_count	integer	number of list item that has been synced against the asn created or partially created.	Yes	
8	error_count	integer	number of list item that has been failed against the asn created or partially created.	Yes	
9	timestamp	string	Timestamp of the response in UTC	Yes	Format: ISO 8601
10	errors	list	Array of errors encountered during sync	No	Present only if errors exist
11.1	code	integer	Error code	Yes	Predefined code identifying the error type
11.2	fieldName	string	Name of the field where error occurred	Yes	Helps in pinpointing the failure

11.3	message	string	Error message	Yes	Brief one-line explanation
11.4	description	string	Detailed explanation of the error	No	User-facing explanation
11.5	error_params	object	Additional metadata related to the error	No	Includes helpful context like `itemId`, etc.
11.5.1	item_id	string	ID of the item that failed	No	Part of `errorParams`
12	warnings	list	Array of non-blocking issues or adjustments	No	Useful for debugging and visibility
12.1	code	integer	Warning code	Yes	Predefined code
12.2	message	string	Warning message	Yes	High-level message
12.3	description	string	Explanation of the warning	No	Optional
13	additional_info	object	Any metadata or future actions needed	No	For client-side scheduling, logs, etc.
13.1	expected_delivery_date	string	Delivery date communicated by supplier	No	Format: YYYY-MM-DD

Error Codes

CODE	DESCRIPTION
SKU Level : Errors	
E112	item ID is incorrect. Revise item ID mapping
E113	Code category is incorrect for this item. Should be
E114	Codes are mandatory for this item.
SKU Level : Warnings	
W102	Item cannot be near to expiry or expired
W103	Unable to find a variant or item with mrp, upc, grammage or uom combination
Status : FAILED, HTTP : 400	
E106	PO already processed; duplicate submission blocked

E107	Invoice number already exists
E108	Invoice date cannot be before PO date
E109	Supplier GSTIN mismatch
E110	Buyer GSTIN mismatch

Note : please note these error codes are immutable won't change in future but can be added more as per the business logic validation changes or updates but those will be in the same range EXXX only.
